## Assignment Task1

王柯然 2100017727

2023年9月30日

实验表明,在大尺度的输入下,使用intertools的方法是最快的,而使用built-in-sum的方法是最慢的,见图1

```
[Running] python -u d:\School_files\NLP\Assignment1\Task0\flatten_the_list.py" the first method takes 0.0311431 the second method takes 1.7814713 the third method takes 0.02132200000000003 the forth method takes 0.01607730000000072
```
